LAWAL OLUWAFEMI IBRAHIM

WEB DESIGNER / FRONT-END DEVELOPER

PROFESSIONAL SUMMARY

Creative and detail-oriented web designer and front-end developer focused on building responsive, visually appealing websites for businesses and personal brands. Experienced with HTML, CSS, JavaScript and Bootstrap, with a strong interest in practical design and usability. I enjoy turning ideas into functional websites, improving interfaces through testing, and creating smooth experiences across desktop and mobile devices. Confident with Git and GitHub, website deployment and independent problem-solving. Currently learning React and open to web design and front-end development opportunities.

PROJECT EXPERIENCE

Independent Web Designer & Front-End Developer
Personal and business website projects

- Designed responsive multi-page websites and landing pages with clear navigation and engaging layouts.
- Built interactive features using HTML, CSS, JavaScript and Bootstrap.
- Tested mobile and desktop layouts, fixed styling issues and refined usability.
- Managed source code with GitHub and deployed projects to Vercel and other hosting services.

SELECTED PROJECTS

LA-CODE — Personal Portfolio
Designed and deployed a portfolio presenting skills, completed websites and contact information.

Fancy Lips — E-commerce Website
Built a responsive beauty storefront with product listings, shopping-cart controls and WhatsApp ordering.

Ember's Delight — Restaurant Website
Created a restaurant website with prominent calls to action, responsive sections and visual storytelling.

MËRCŸ — Cake Business Website
Developed a multi-page business website with services, project imagery and WhatsApp enquiries.

Headphone Product Landing Page
Created a product-focused landing page with animated visuals and responsive styling.
